What is ECASoft?

ECASoft is a one-stop cost-effective software solutions and services provider for all kinds of businesses.

Merging technology with business we help our client's businesses to:

[Enhance productivity
[Ease infrastructure maintenance
[Increase profitability and growth.

Specializing in automating and mobilizing corporations and individuals by changing the way they access, use and exchange vital and confidential information, by using the latest in Internet / Intranet, Client-Server, Enterprise, Wireless and Security technologies.

Comprised of an experienced, skilled and a highly motivated development staff, we enable our client's to automate their businesses in every possible way.

Our growth being directly dependant on our client's growth and success is one of the major forces that drive us to creating Quality Software.

ECA Philosophy

Do not go where the path may lead, go instead where there is no path and leave a trail.
Ralph Waldo Emerson

Quote

"It is not because things are difficult that we do not dare; it is because we do not dare that they are difficult."
Seneca

Company Objective

Our objective is to merge technology with business and unleash the potential of our client's business operations thus enhancing productivity, decreasing competitiveness, increasing profitability and growth, and to create a world where all vital information according to our client's need is at their fingertips, regardless of their geographical location.

Another major objective we keep in mind while developing software is Quality.
We believe in developing software that is Extensible, Customizable & Applicable.

ECA Goal

We at ECASoft have a deep desire in developing solutions that comprehensively address our client's requirements, identifies and provides solutions to restraints, using the best available technology.

Quote

"We are what we repeatedly do, Excellence is therefore not an act but a habit."
Aristotle

Client Benefits

Shortened Development Time Frame

Meeting deadlines is a crucial factor in software development and we achieve this by skilled human resource availability & effective project management skills.

Cost Effectiveness

Being a Pakistan based organization; we are able to employ skilled labour that is relatively cheap as compared with the western markets. In turn the cost incurred by our clients is also relatively very low.

High Reliability

We have a well-organized logistics structure that makes it possible to effectively handle large software projects. Daily backups of all ongoing and completed projects are one of our policies that help us to stay on schedule at all times.

Diverse Range of Software Architectures

ECASoft believes in turn-key solutions and based on this fact we offer a wide variety of software architecture for:

[Desktop Solutions
[Client Server Solutions
[Distributed Solutions
[Internet, Intranet & Wireless Solutions.

Extensible Customizable Applicable Software

Client Benefits

Wide Range of Services

From consultancy to website development to business solutions, we have managed to gain expertise in many arenas of software development, some of them include:

[Consultancy services
[Website / Web application development
[Business & Industrial software development
[Graphics design & development

High Degree of Confidentiality

We have based our organization on strong ethical and moral values, and believe in long-term relationships that can only be achieved with trust. The information provided to us by our clients is at all times kept confidential.

Quality Software

We believe in providing Quality software to our clients that are an asset to them, and for that we have devised rigorous quality assurance methodologies and techniques. This is one of the policies that we never compromise on, as we believe that it is the quality factor that keeps bringing our clients back to us each time.

Our Services

The service industry needs quality and reliability and are objective is to provide our clients with both.

Consultancy

Providing round-the-clock consultancy services we help our clients improve the way they use technology to gain maximum benefit from it. We provide consultancy in 3 major areas:

1. Software Engineering and Architecture Designing
By analyzing our clients business and identifying the appropriate software they would need for proper & accurate information flow. We advise them to either buy existing software or design customized software as per their requirements.

2. Corporate Networking
We help our clients implement a corporate network so that the information they posses can be shared by them in the best possible manner keeping all kinds of security & financial constraints in mind.

3. Training
Our team comprises of seasoned software engineers with good teaching backgrounds. We provide training for MS-Office products, computer languages, tools & technologies to those clients that want to make best use of their in-house software team.
